

# Type IV Cryomodule Design

(Working within an international collaboration)

---

## Collaborations begin with the people!

- FNAL
- SLAC
- JLAB
- INFN Milan, Pisa
- KEK
- DESY
- And more to join

The Fermilab Design Team\*

## Communication is essential!

---

- We needed a way to share information.
- We needed common tools.
- DESY has been very accommodating and has provided their Team Center Enterprise (EDMS) as well as their IT services as part of their collaboration effort. No cost to the user. –Thanks!

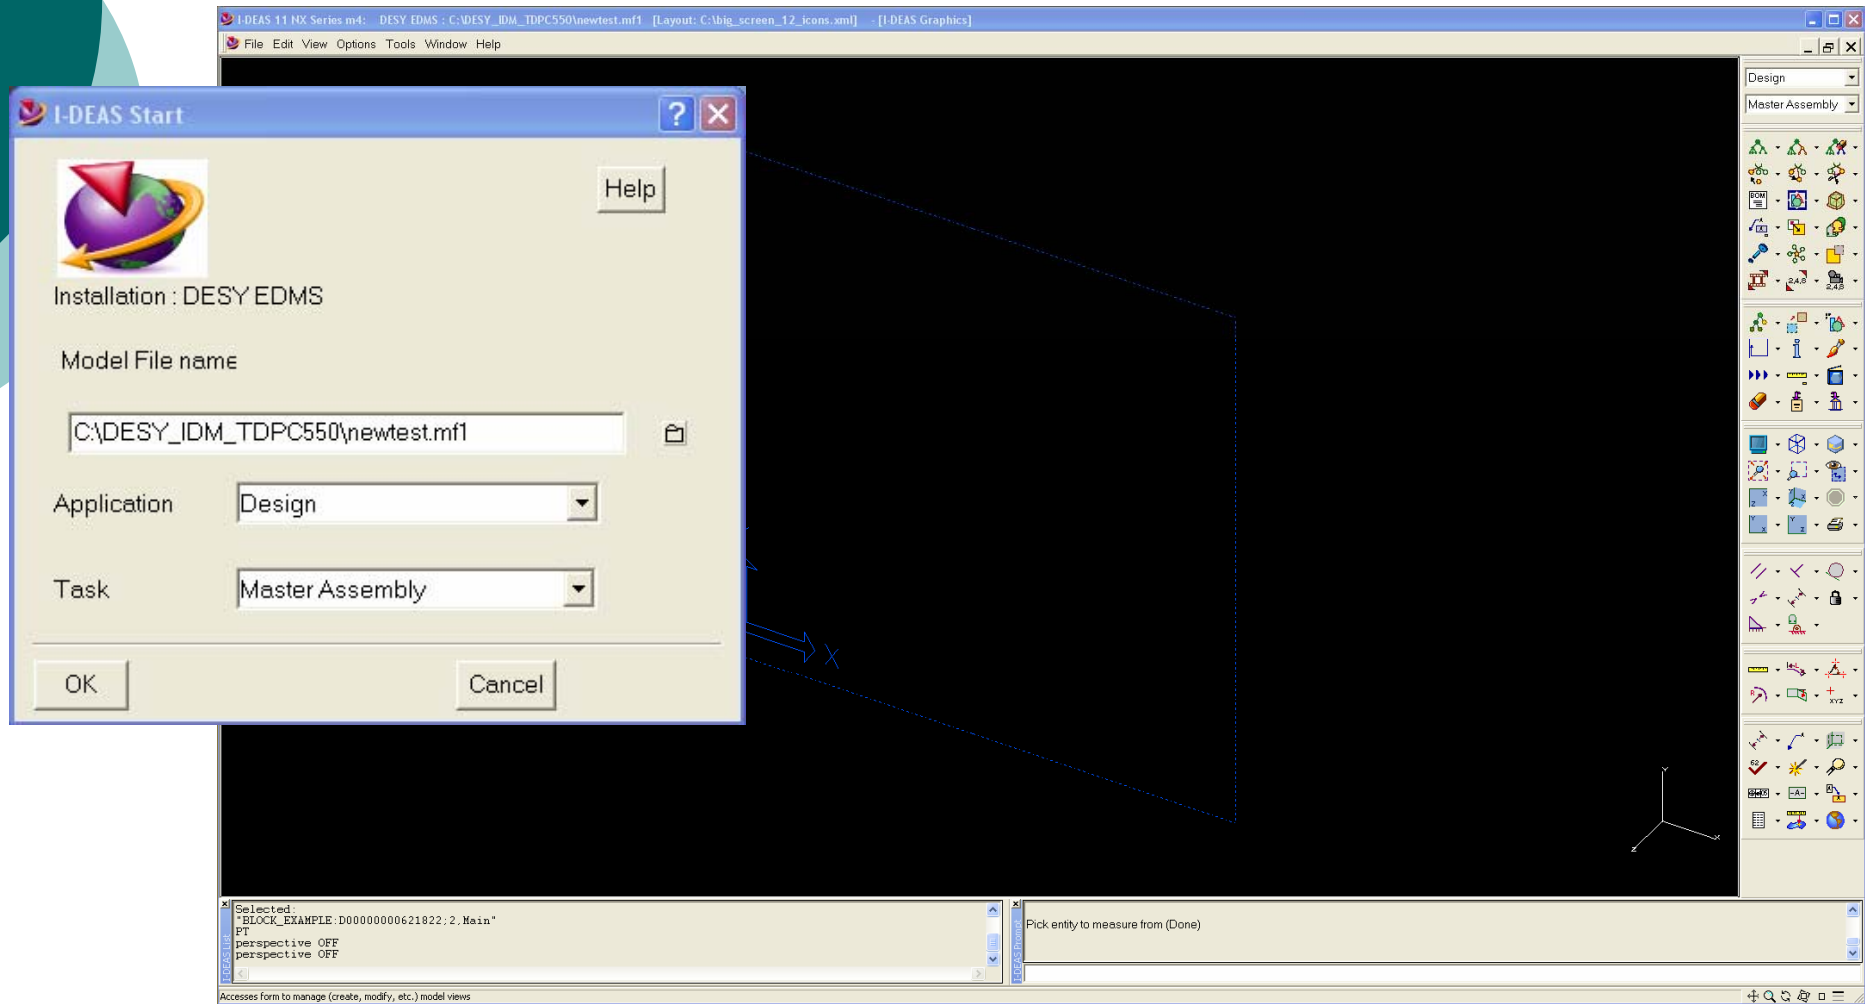

## Common CAD tools

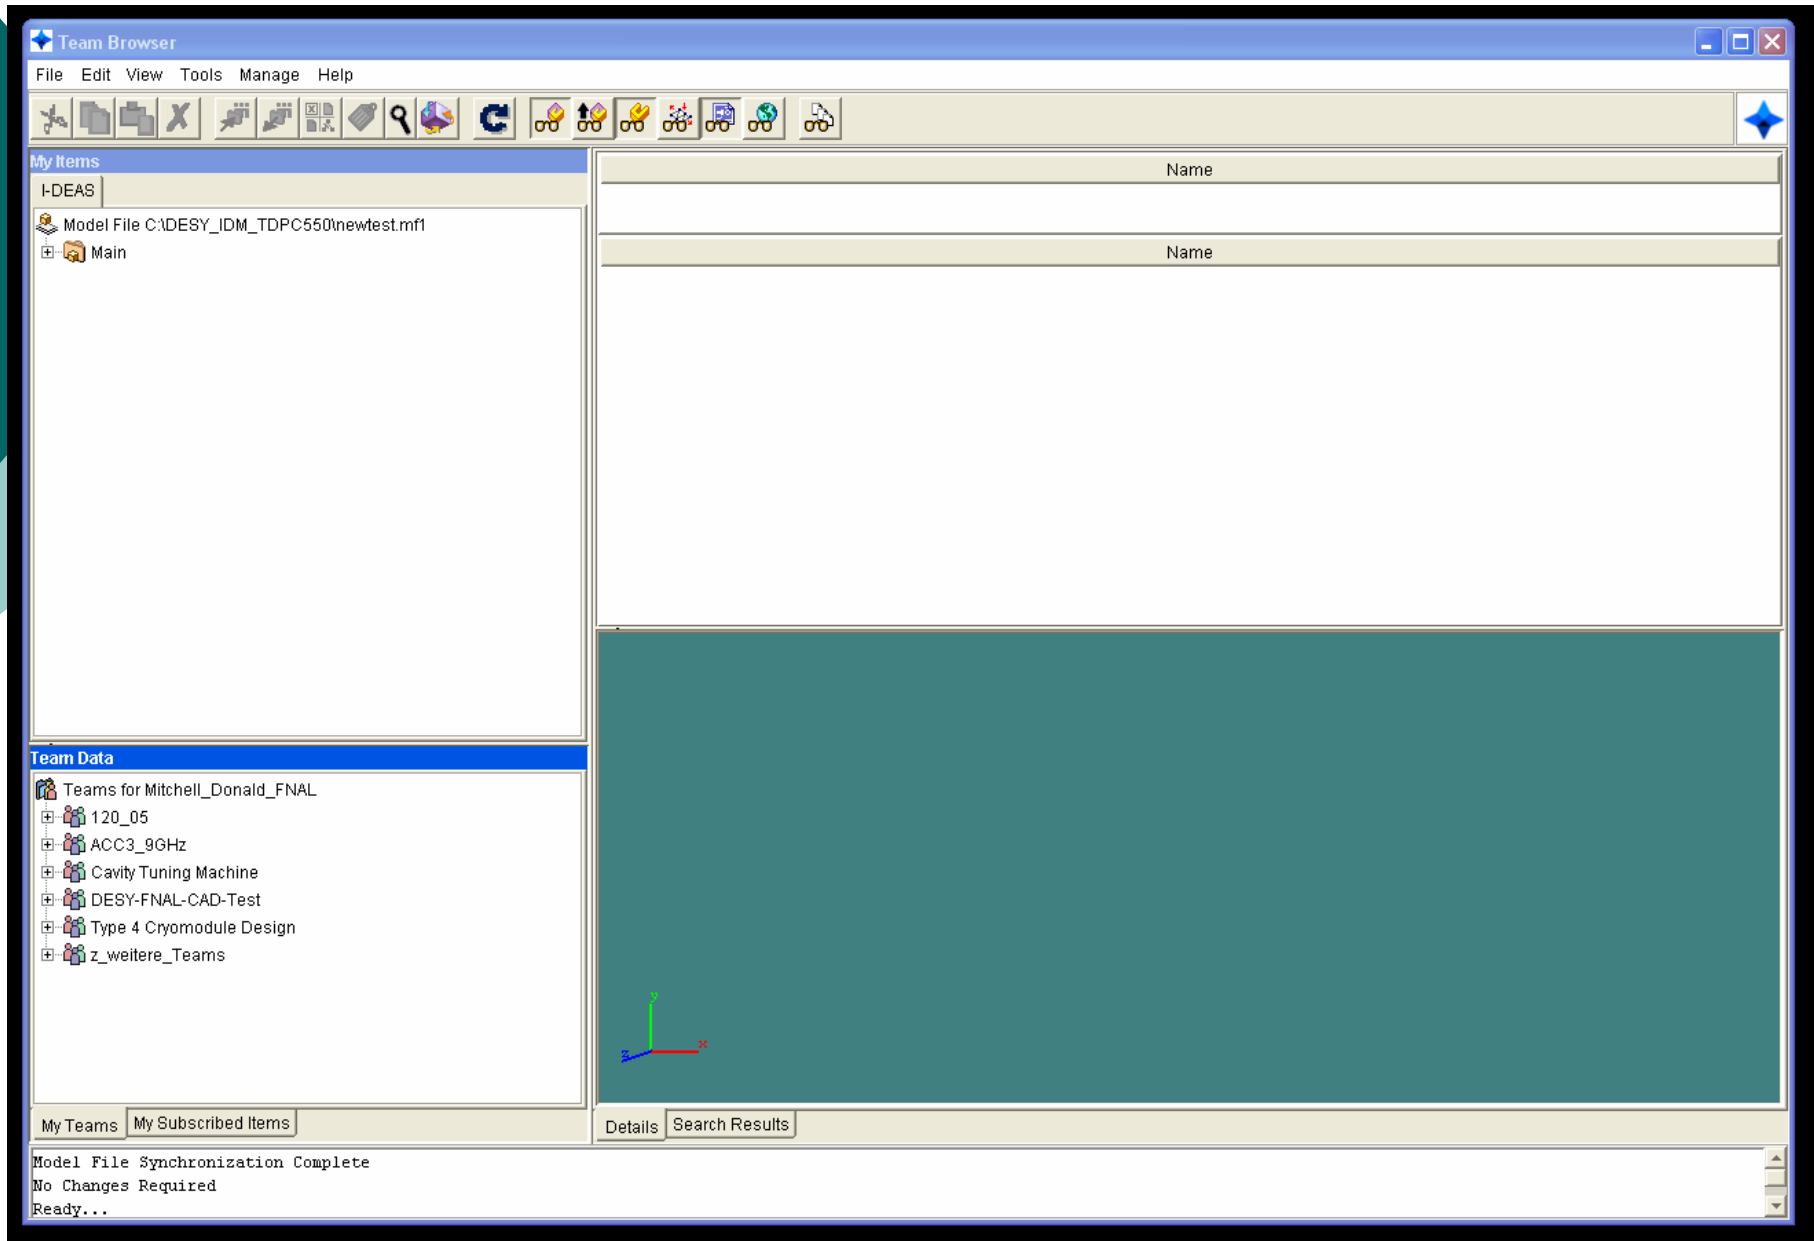

---

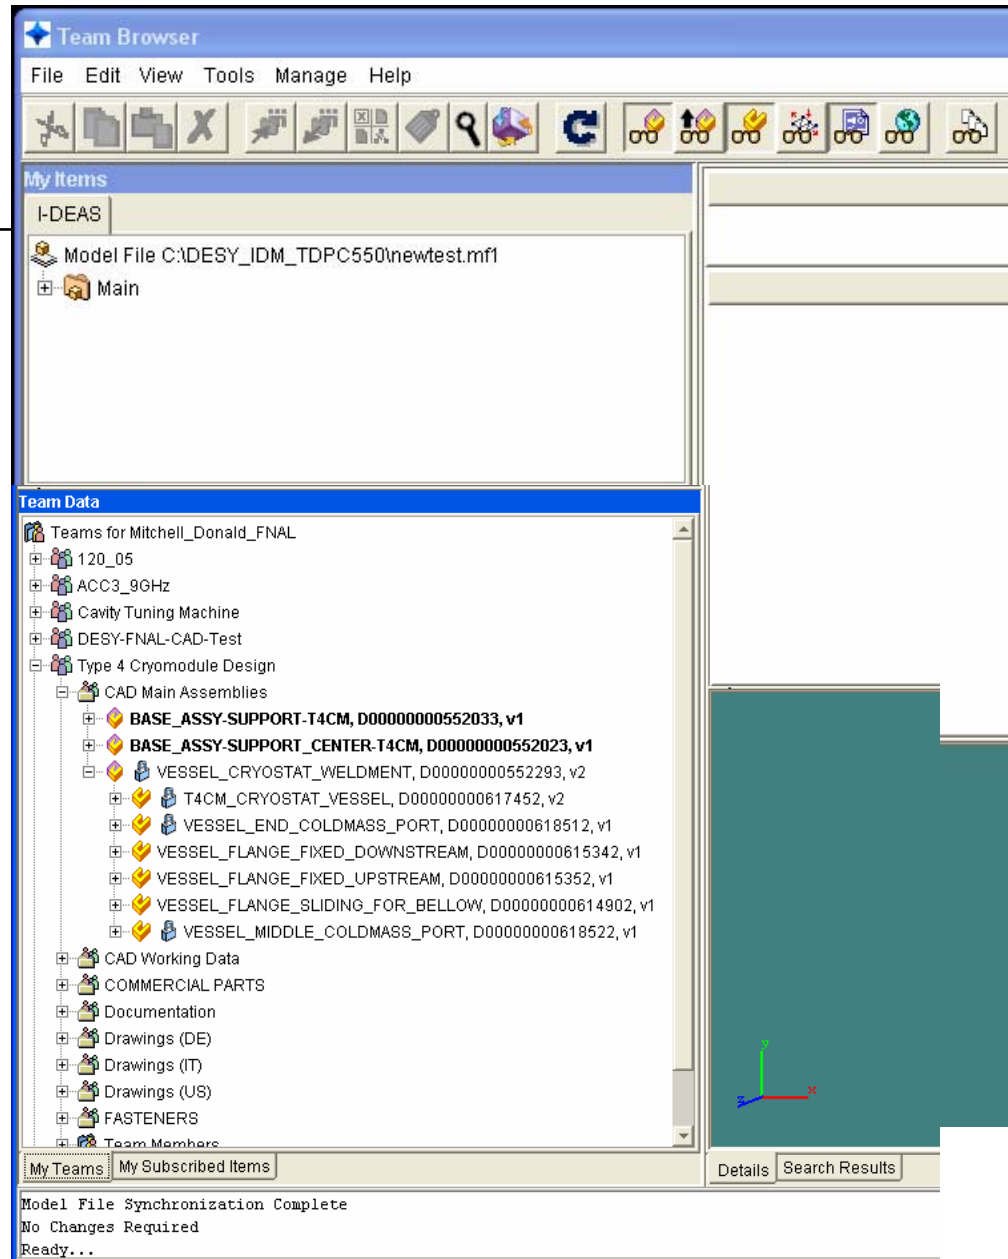

- FNAL: I-DEAS v.12
- SLAC: Solidedge
- JLAB: I-DEAS
- INFN Milan: UG-NX & I-DEAS v.12
- INFN Pisa: I-DEAS v.12
- KEK: I-DEAS (recent purchase)
- DESY: I-DEAS v.12

Note: These are all UGS CAD products and are “team browser” compatible with Team Center Enterprise. However, the current supported platform is I-DEAS v.12 with plans to add other CAD packages soon.

# The DESY EDMS Team Browser

## Customizing your own environment

---

- DESY provides:
  - Data storage system (EDMS)
  - Item numbering
  - Design team folders
  - VisView licensing
  - EDMS Support
- You must provide:
  - the CAD software (I-DEAS v.12)
  - Your own 2-D title blocks
  - Any customization to your CAD setup

## Web based “Thin-Client”

---

- All team members, not just CAD users, can have immediate access to ALL electronic files, not just the 3-D and 2-D data.
- Via the web, the data is viewable.
  - BOM review
  - 3-D model and 2-D drawing file viewing and markups
  - Data file upload and download

# “Thin Client” look

---

## Current Collaboration Status

---

- December '06: New release of TC Enterprise and upgraded I-DEAS to the latest version (v.12).
- Rolled out EDMS patches and \*.JAR files to our community so that all users can continue to work.
  - All institutions need to get on DESY's software update distribution list!
- Spreading the unified EDMS concept to the ILC community.

# Bringing Our Collaboration Together

---

- November '06: Training at FNAL
  - EDMS usage
  - VisView usage & “conferencing”
  - I-DEAS 3-D training
  - Excel driven I-DEAS models
- Next steps:
  - Each institution must now work with DESY to connect into the EDMS.
  - All 3-D models need to be stored in EDMS in the native, I-DEAS format.
  - Any non I-DEAS drawing data needs to be “related” to the 3-D model for easy access to the data by all collaborators.

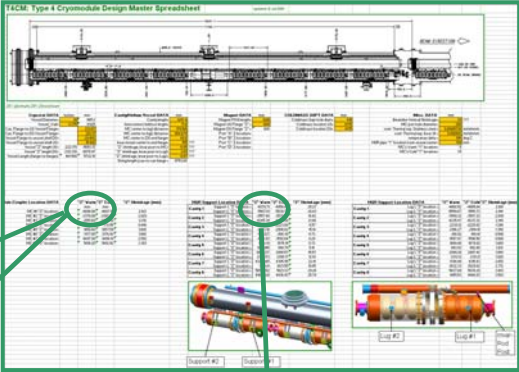

## Data Example with ACAD dwgs

---

- Big Bertha was drawn without a 3-D model.
- The 3-D model was created using the 2-D drawings, but the model and drawings were not associated.
- The drawings were converted into I-DEAS drawings and a simple view was added to link the 3-D and 2-D data.
- The native ACAD drawings were also “related” to the parts and assemblies in EDMS using the “thin-client” tools.
- Now, the original drawings and the 3-D model are all accessible from within EDMS.

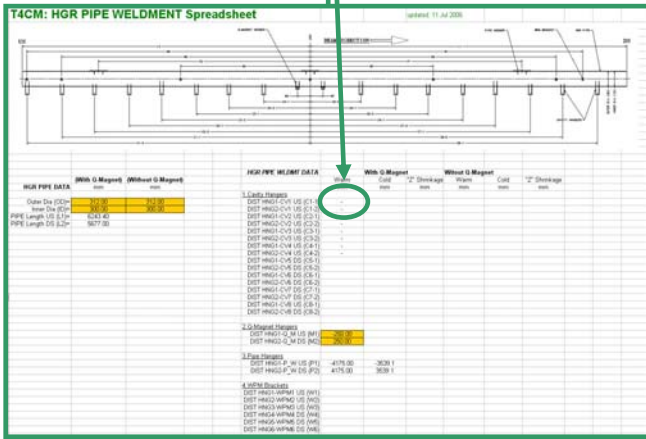

# Managing the CAD Model with Excel & I-DEAS

## Become a DESY EDMS member

---

- Send Don Mitchell ([dmitchel@fnal.gov](mailto:dmitchel@fnal.gov)) your user's names and e-mail addresses. e.g.
  - - Fabrizio Raffaelli [fabrizio.raffaelli@pi.infn.it](mailto:fabrizio.raffaelli@pi.infn.it)
  - - Andrea Basti [andrea.basti@pi.infn.it](mailto:andrea.basti@pi.infn.it)
  - - Giovanni Martinelli [giovanni.martinelli@pi.infn.it](mailto:giovanni.martinelli@pi.infn.it)
- I forward them to DESY.
- DESY sets up the accounts.
- I add your name to the design team.
- You work with DESY to setup your "team browser" (portal into EDMS).  
For help: [ipp-support@desy.de](mailto:ipp-support@desy.de)
- You're in!

## Upcoming ILC EDMS Roll-out

---

- Soon, the ILC will have its own EDMS, separate from the DESY EDMS.
- Lars Hagge (DESY) will talk to this point later today.
- The main difference will be the added “release” capabilities.
  - We wish to have a separate meeting later today to help develop the release process.
  - Planning for this began in August 2006 at FNAL.
