Tentative Agenda for 5th TB and SGC Joint meeting on Dec. 21 (from 13:45 to 17:45)

13:45 to 16:30 **Open Session** 13:45-13:50 **Opening Address** by J.Urakawa 13:50-17:45 Review of Hardware and Instrumentation R&D's at ATF from 2007. June to Dec. (mainly, Fast Kicker R&D, Nano-BPM, FONT, Laser wire at EXT, X-SR Monitor, Fast Ion Study) 13:50-14:15 Proposal of Beam extraction by using strip-line kicker with pulse bump orbit by T. Naito, 14:15-14:45 Laser wire R&D progress, FONT, X-SR, IPBPM, Fast Ion Study by N. Terunuma, by T.Tauchi 14:45-15:15 Status of ATF2 project 15:15-15:55 Presentations for New Proposals (If necessary.) 15:55-16:10 15 min. Break **Closed Session** 16:10-16:40 TB and SGC Joint Discussion (ATF2 Construction Schedule and Beam Commissioning) **16:40-17:25** Preparation of Summary (45 min.) **Open Session** 17:25-17:45 Concluding Remarks by A. Wolski 19:00-21:00 ATF Year-End Party (Bounennkai, Unforgetable Party) 1 At KEK No.3 Building, 1st Floor, Meeting Room

Good things in this year!

- 1. Number of ATF collaborators increased to more than 200. (This thing requests a good scheduling and coordination.)
- 2. Near establishment of laser-wire system in this week. Next step, training to the laser-wire operation for ATF2 beam tuning.
