Aspects of shift organisation in multi-partner team context

- Exploit on-site & remote expertise + participation in shifts

- Maximise collective handling & use of data & tools

- Pre- and post-shift communication (preparation, analyses,…)

1) **Agree and publish shift programs**

2) **Check-lists for specific operations & actions**

3) **On-call experts for specialist topics & questions**

4) **Standardised format & uploading method for e-log during shifts**

5) **Idem for shift reports after shifts**

6) **Common data areas allowing widest local & remote usage**
