

Controls & LLRF update

John Carwardine
20 August 2008

Controls & LLRF

- Controls
 - ILC Controls collaboration activities continue to be largely stalled. Some limited activities may be restored in US FY09.
 - (XFEL development on ATCA/uTCA is proceeding)
 - Ray Larsen, Claude Saunders, Margaret Votava, Patrick Le Du will run a 2-day ATCA workshop at Nuclear Science Symposium in Dresden.
- LLRF – focused on TTF/ILC 9mA studies program
 - Several collaborators will participate at DESY with 9mA studies and LLRF shifts in Sept.
 - DESY/LLRF Group will demo remote participation tools to collaborators from Fermilab, KEK,.. (scheduled for next week)
 - Remote access tools for monitoring FLASH data were demo'd at SLAC (Shilun Pei).
 - Planning continues for 9mA studies in Sept for the overall program.
 - Hoping for additional LLRF focused studies prior to 9mA shifts
 - Studies on RF overhead, high gradient studies, etc are slated for the January and May studies periods.
