

A green chalkboard with a world map in a light fixture above it and a wooden ruler on the left side.

Going digital and ahead!

Antonio Bulgheroni

# Experience

📖 We don't have any past experience,  
but this (Strasbourg) is the right place  
to ask questions

# Clustering?

📓 How to find the cluster center with only binary pixel?

📓 Eta function?

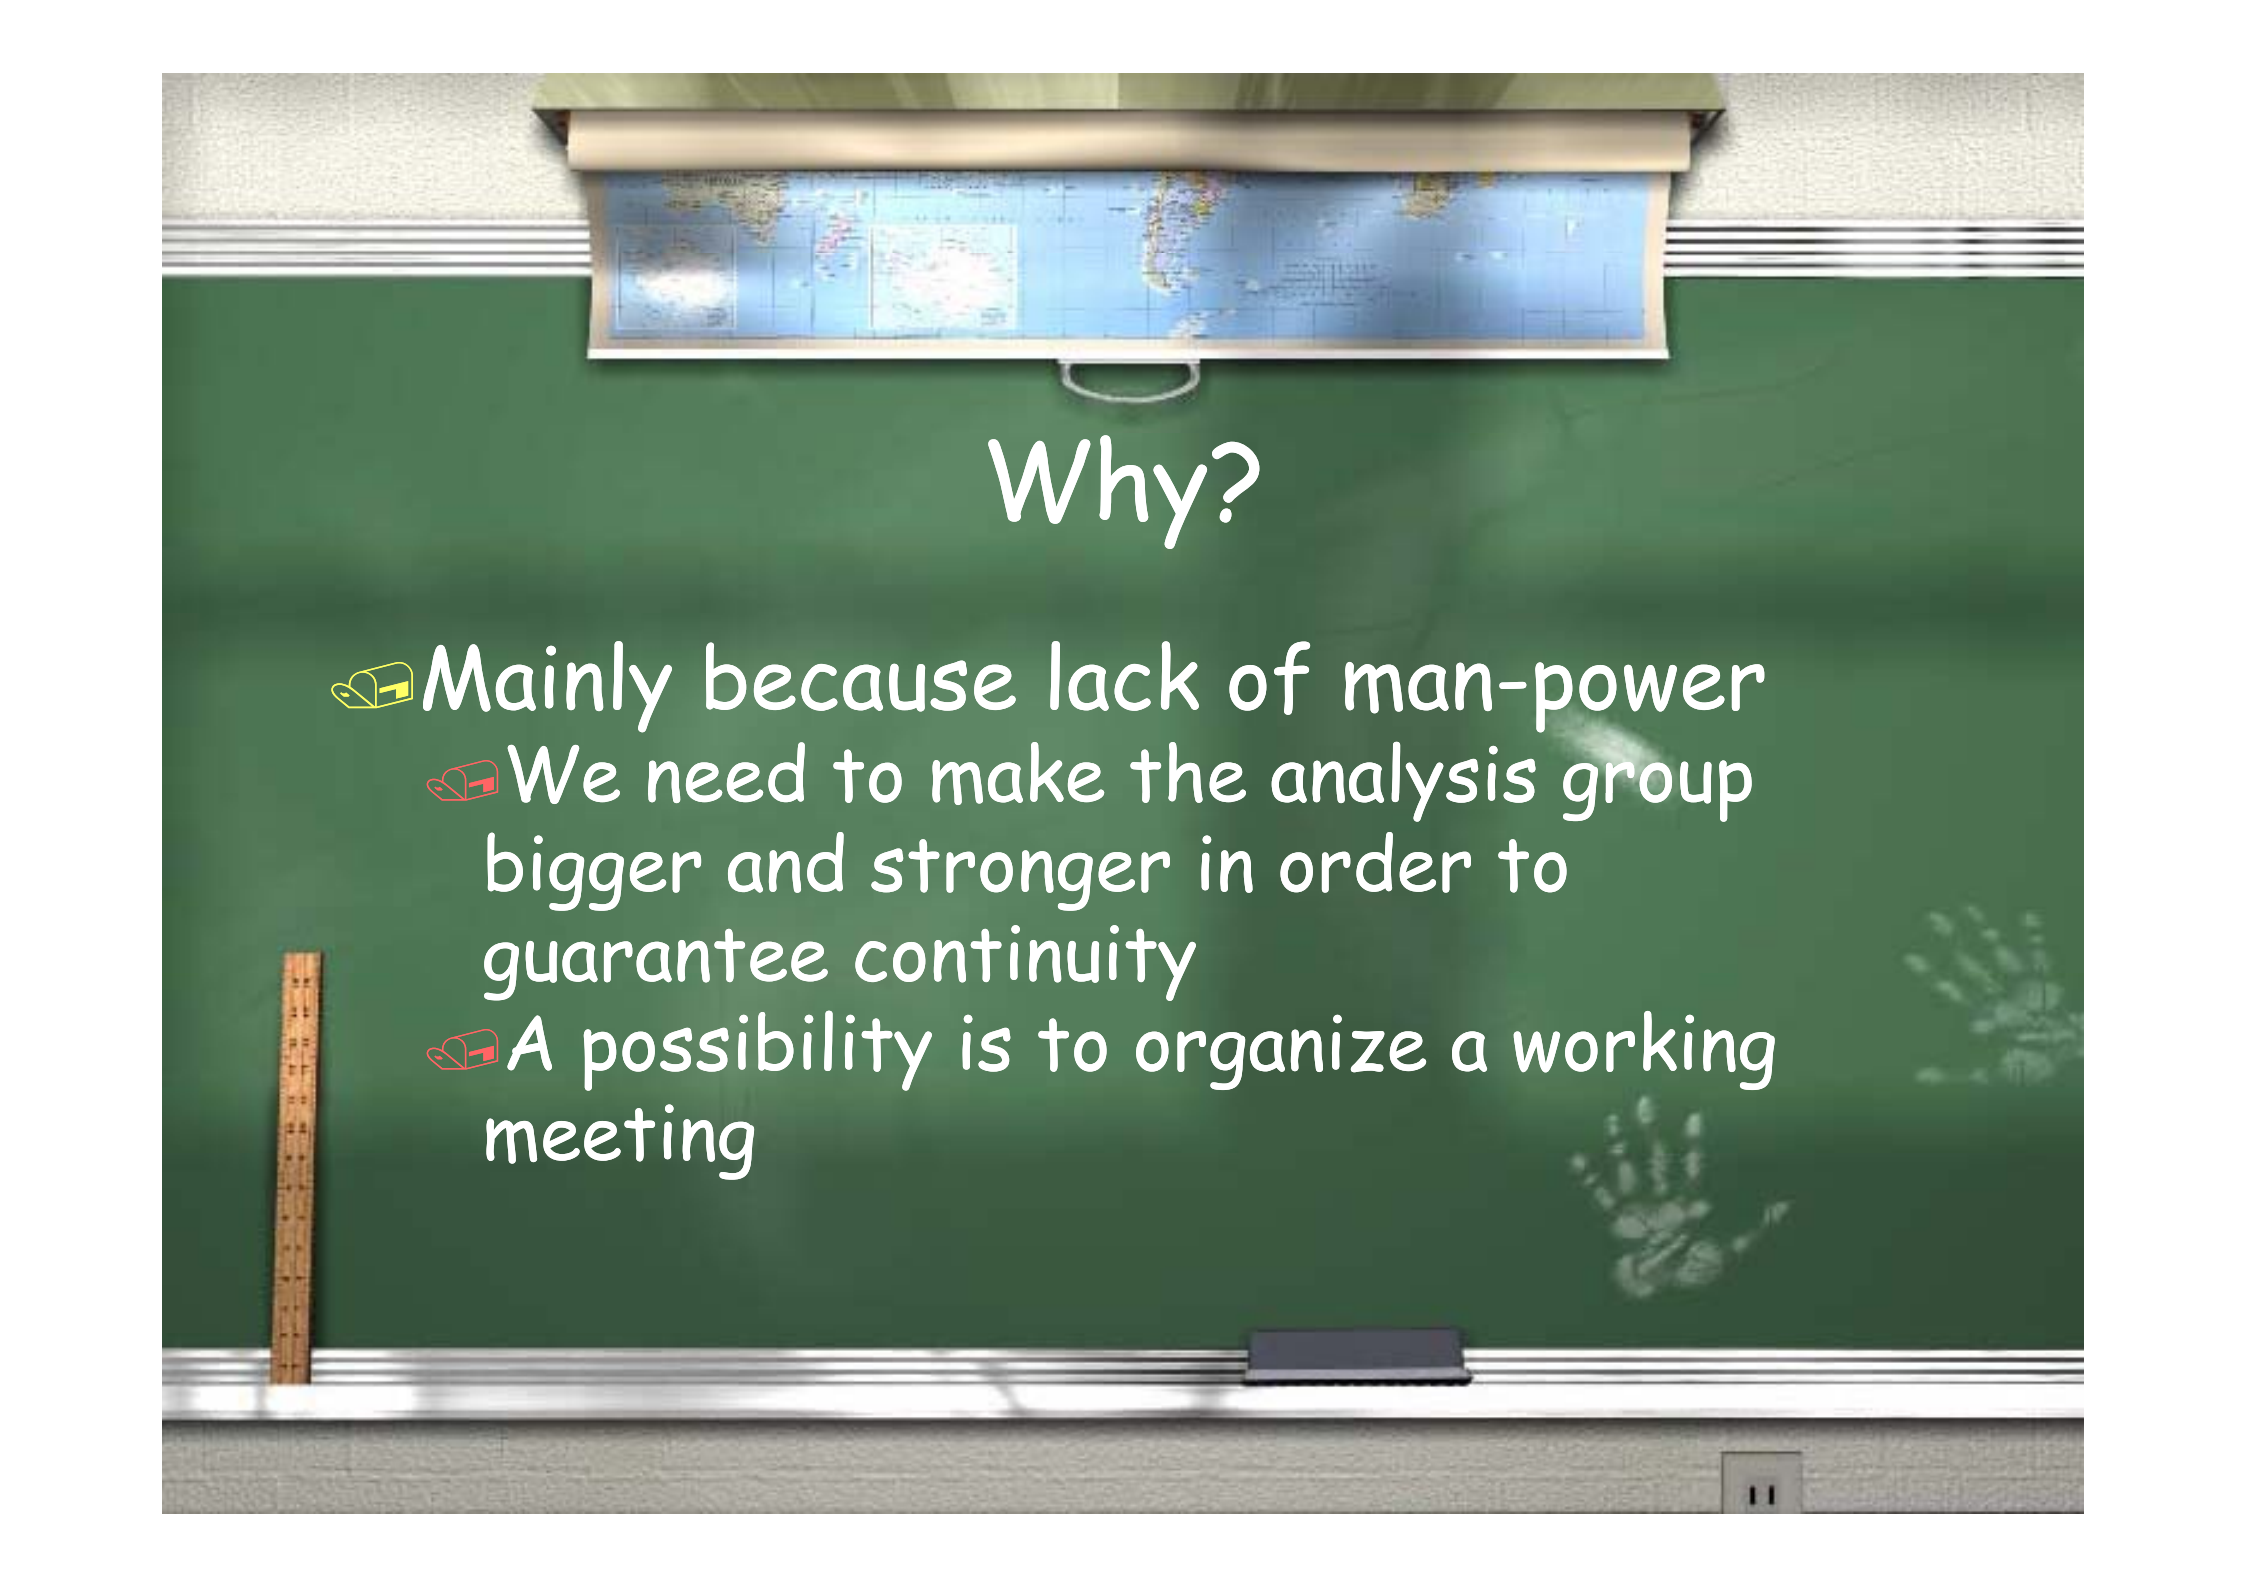

# Other digital issues

📁 All other things we should be aware of

# Analysis status

- 📁 We are quite behind the schedule
  - 📁 The telescope data from CERN08 TB have been analyzed but not in detail.
  - 📁 A summary of each data sample is missing
  - 📁 Offline support for user is not as prompt as foreseen

# Why?

📁 Mainly because lack of man-power

📁 We need to make the analysis group bigger and stronger in order to guarantee continuity

📁 A possibility is to organize a working meeting
