

ILD: Introduction

- Status of ILD integration: Catherine
- ILD software: status and discussion; Frank
- The physics case for a large scale production until 2012: Mikael
- The case for a further detector optimization: Mark
- SB2009: the ILD perspective: Akiya
- Discussion and plans: Yasuhiro/ Ties

2009/ 2010

2012

What has happened since Paris

People:

New member of the EB for forward tracking: Alberto Ruiz

Takeshi Matsuda has replaced Keisuke Fujii as tracking contact

New Web master: Tomohiko Tanabe

Letter of Intent: updated versino as of February 2010 available: this will be put into archive

Integration/ real estate task force:

- Karsten Buesser
- Catherine Clerc
- Mathieu Jore
- Uwe Schneekloth
- Yasuhiro Sugimoto
- Frank Gaede

Background task force

- Mark Thomson (convener)
- Katarzyna Wichmann
- Rita de Masi
- Steve Aplin
- Akiya Miyamoto
- Daisuke Kamai

Report from IDAG interview

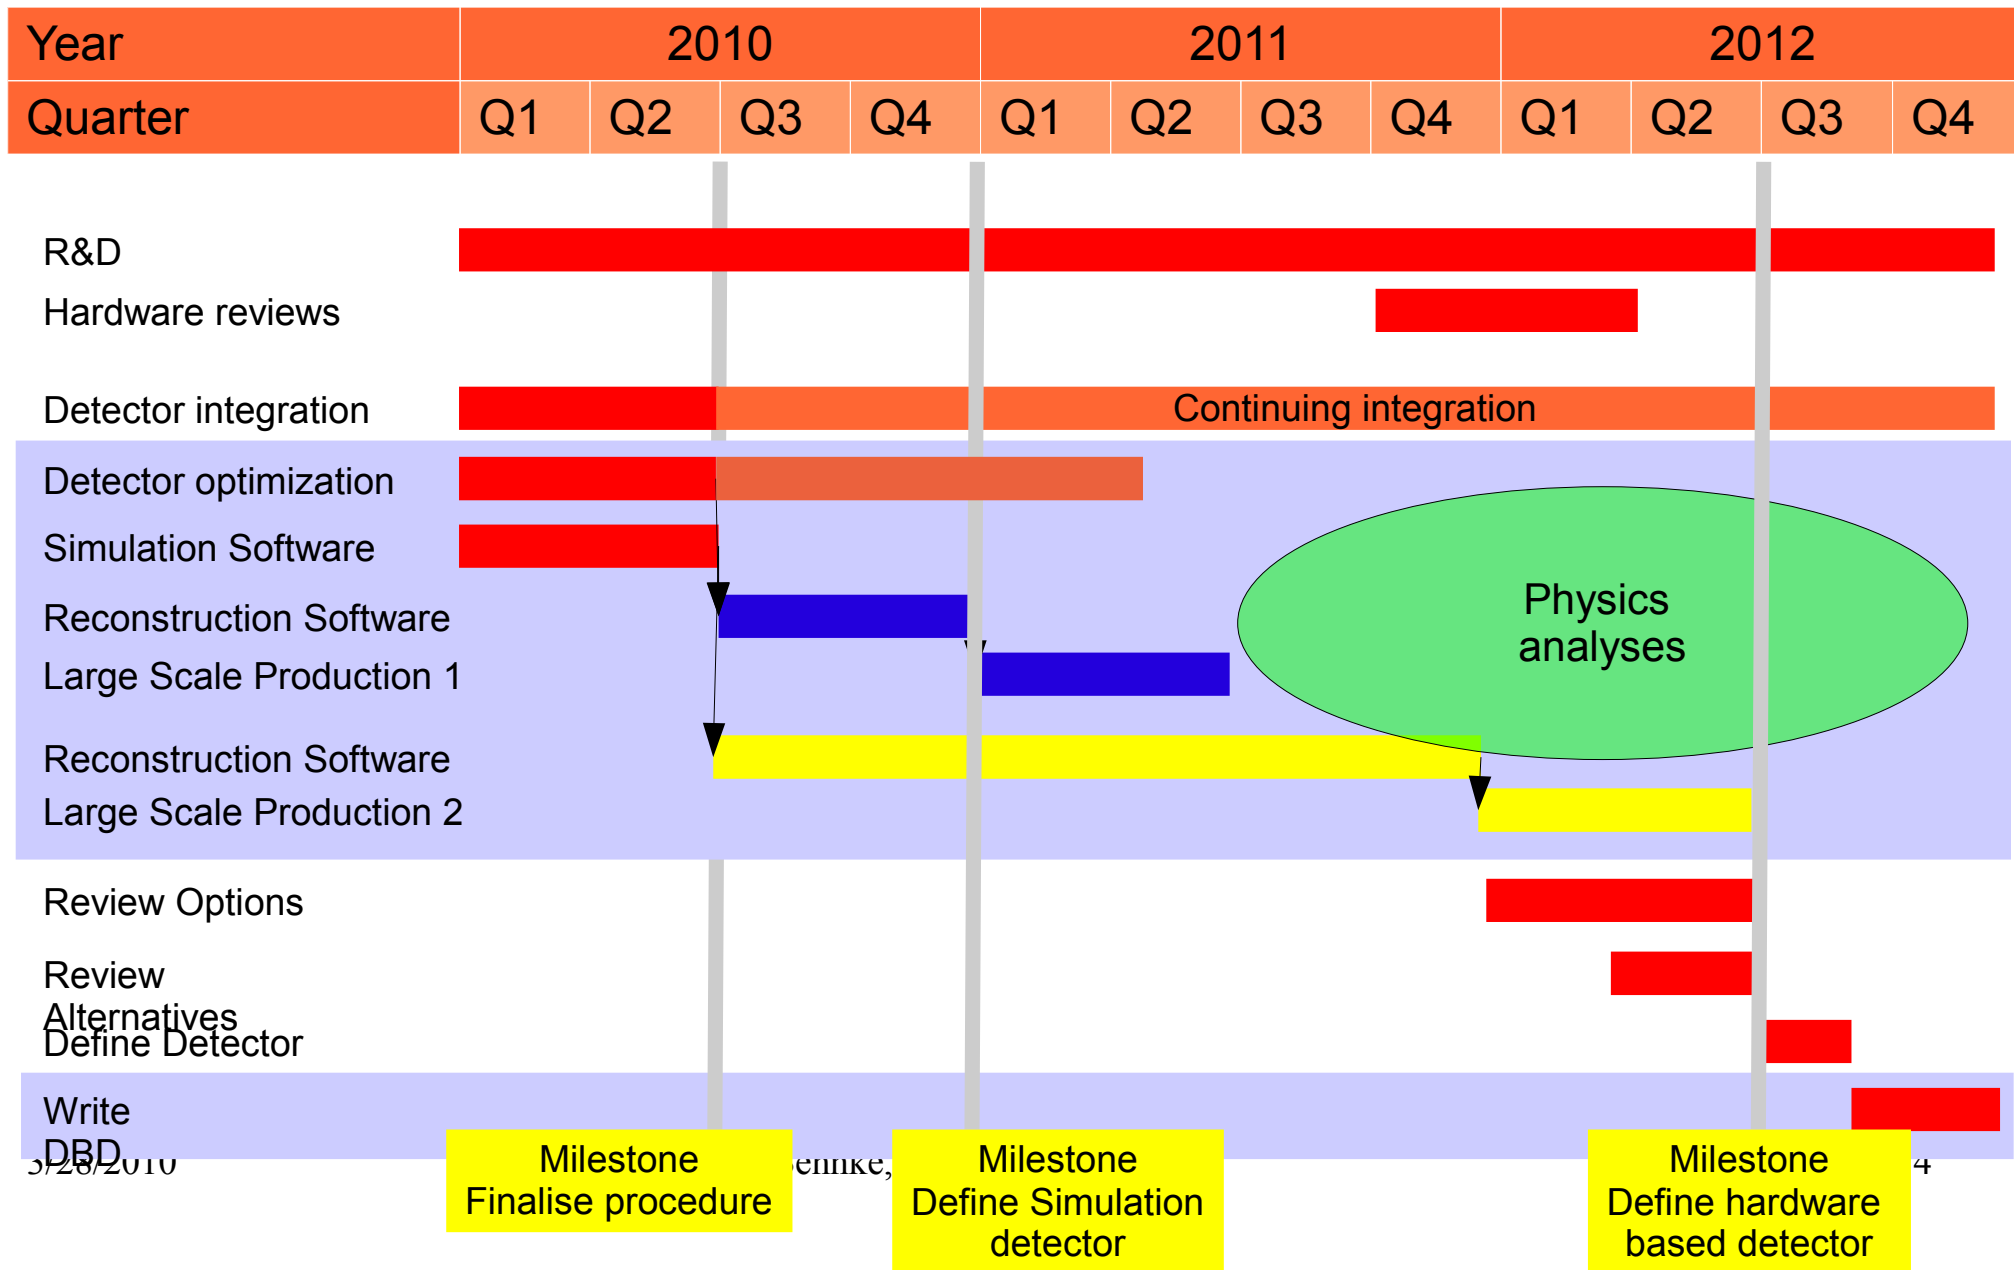

IDAG interviewed ILD at this meeting:

Ties Behnke, Mark Thomson, Tohru Takeshita, Yasuhiro Sugimoto,

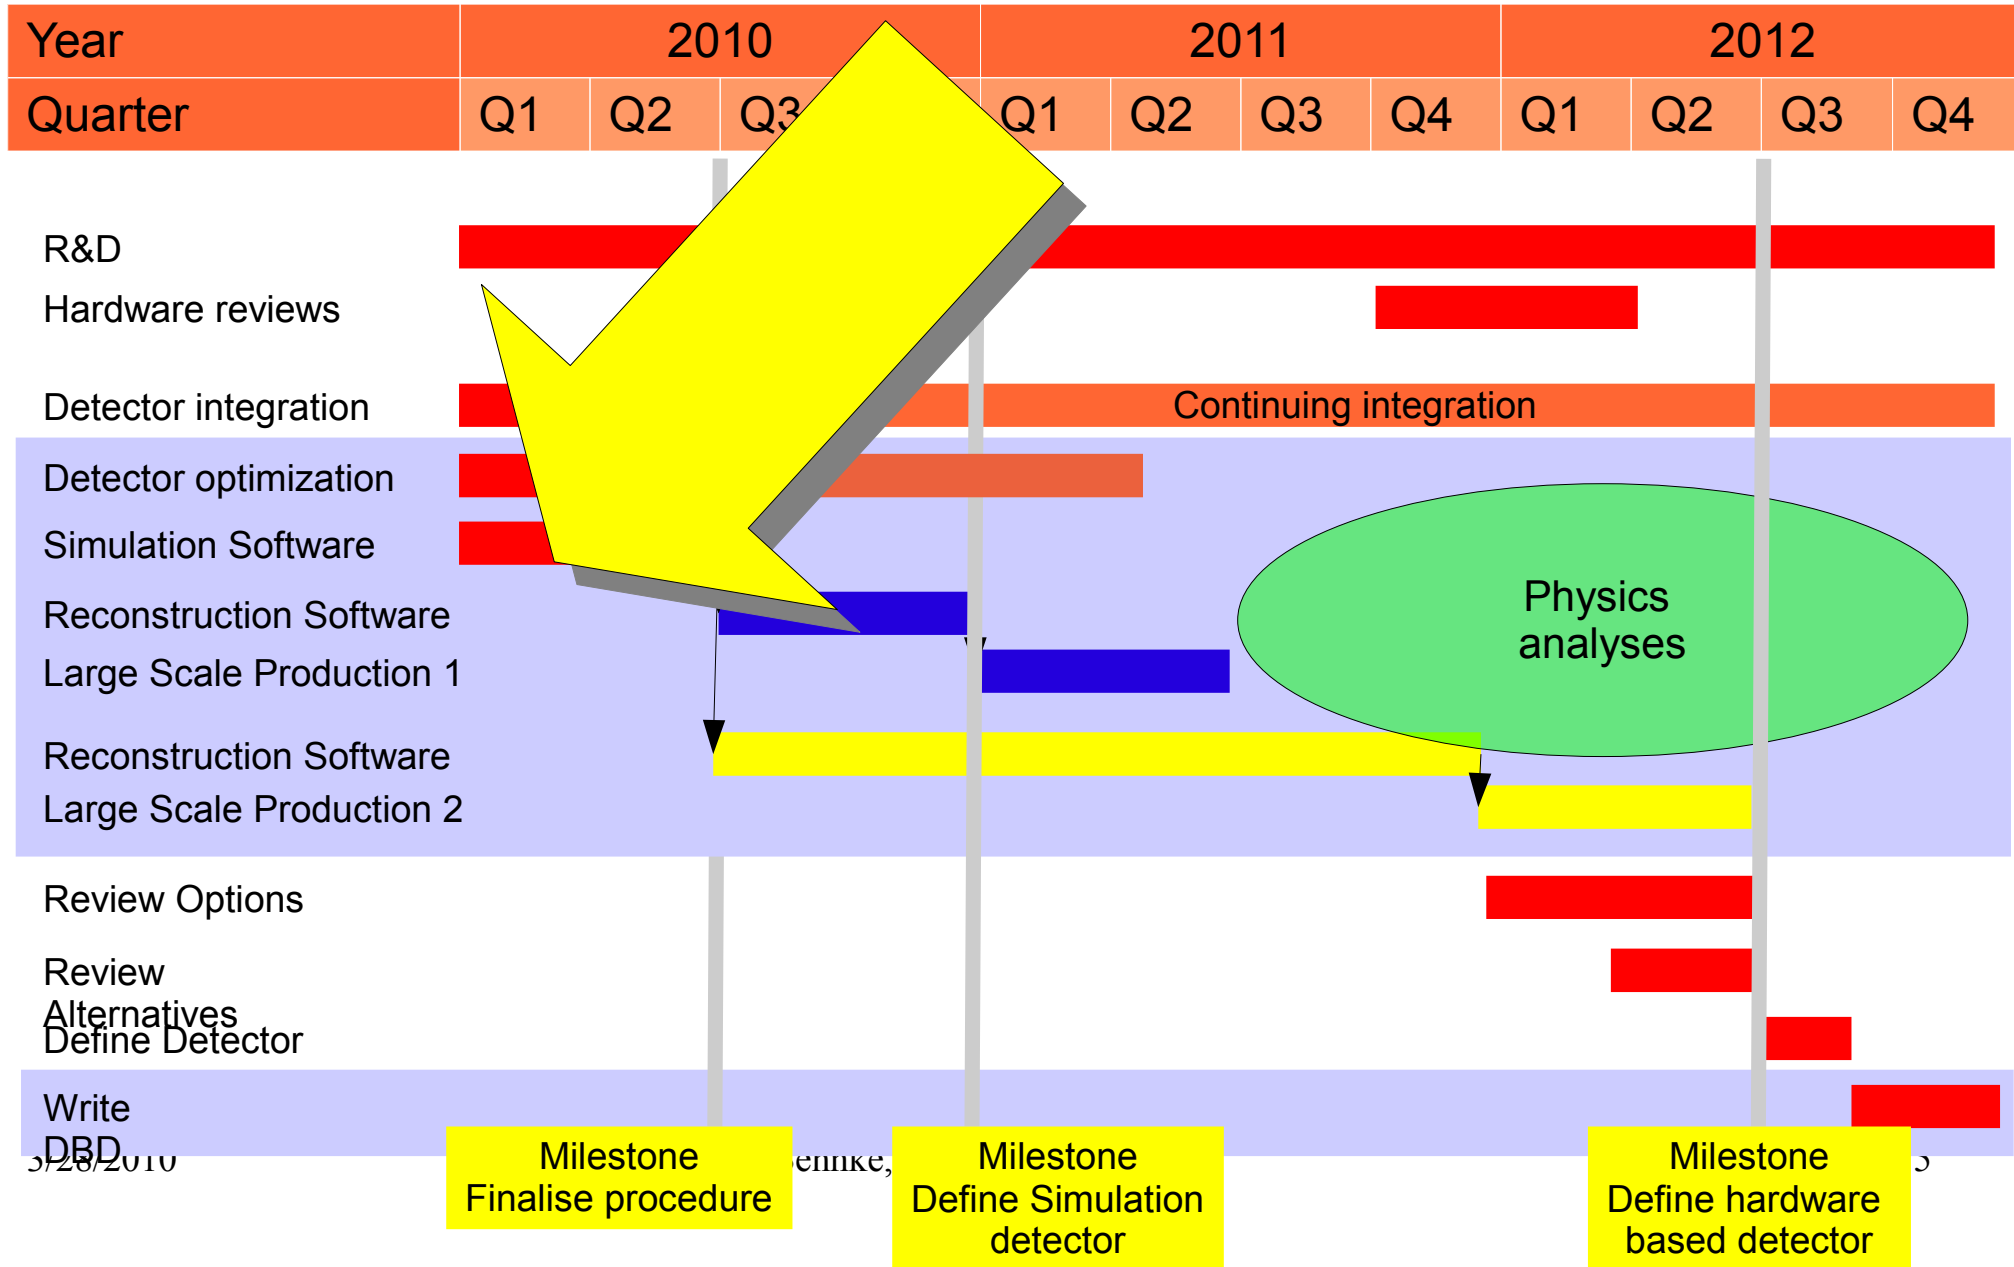

- we presented our plans towards the report in 2012
- there were no serious comments or objections
 - some questions concerning the two baseline concept
- we expressed the problem with resources

- discussion on bench mark processes:
 - physics panel has been charged to reduce the list to assign priorities
 - there is some agreement that the 1TeV production is important

Main Milestones

Main Milestones

Goals for today

Exchange information / bring us up-to-date

Software/ Reconstruction: discuss the two scenarios, prepare decision which needs to be taken this summer

Start a discussion on manpower and technical/ engineering needs in ILD

Continue to refine our planning
