

Discussion on 'Alignment and DR status'

- Horizontal emittance
 - Big Σ_x measured in EXT
 - IP beam size growth through multi-pole field
 - New LW will be installed in DR, which can measure \int_x , \int_y and \int_z .
 - Need commissioning time
- Stability of dE/E, orbit, ...
 - Development of Feedback software
 - Button BPM in BS*X
 - Electronics : SLAC-stripline BPM or digital scope
- Any new hardware request by end of July
- 3 Hz Operation
